Information Technology

Stetson's Office of Information Technology is here to help you succeed in your academic venture.

Our team manages and provides technical support services in and beyond the classroom. These services include network connectivity, Internet access, Canvas, e-mail services, printing, Wifi, broadcast services, and access to the My.Stetson/Banner ERP system which handles our students' and employees' administrative services.

We work together with faculty and administrators to provide classroom technologies that enhance collaboration and student learning. In an effort to maximize availability, we offer many applications through our virtual lab ((https://vlab.stetson.edu/)https://www.stetson.edu/administration/information-technology/services/virtual-lab.php) site. This enables students, faculty, and staff to access a lab environment at any time and from anywhere.

The Information Technology team is also a key member of the strategic leadership group that advocates for the integration of technology in support of the academic and administrative goals of the University. I.T. comprises a multi-talented team of professionals, spanning all three campuses, dedicated to delivering innovative technology to the entire University community.
